Yug Rajeshkumar Patel

Software Engineering Student | AI Product Builder

Pune, Maharashtra, India | +91 9265345302 | yugpatelrvp1964@gmail.com | github.com/ATLOWEST/voomate

PROFILE

Early-career software builder pursuing Computer Engineering, with hands-on experience turning ambiguous product ideas into working full-stack systems. Building Voomate, a governed AI customer-support platform, and collaborating on a practical e-commerce operations dashboard. Comfortable learning unfamiliar tools, using AI-assisted development responsibly, and improving systems through testing and feedback.

SELECTED PROJECT EXPERIENCE

Voomate - Multi-tenant AI Agent Platform

Independent Builder | 2025 - Present

A multi-tenant web and voice customer-support platform with RAG-based knowledge retrieval and a pgvector-backed vector database.

- Built a TypeScript monorepo with a Next.js merchant dashboard, Fastify control-plane API, embeddable web component, shared Zod contracts, and AWS CDK infrastructure definitions.
- Implemented tenant-scoped Postgres/Supabase data flows with Row Level Security, organization and agent boundaries, Drizzle migrations, and structured API validation.
- Developed the Web Agent knowledge path: website discovery, rendered extraction, sanitisation, semantic chunking, pgvector retrieval, grounded answers, and merchant content controls.
- Built controlled customer-data capabilities with permission checks, allowlisted outputs, audit records, rate limiting, prompt-injection boundaries, and automated evaluation and smoke-test scripts.

E-commerce Operations Dashboard

Builder Collaboration | 2025 - Present

An in-progress dashboard for a dropshipping/e-commerce operation.

- Work directly with the business to translate day-to-day merchant needs into focused dashboard views for order, fulfilment, supplier, and customer-support workflows.
- Prioritise usable workflows over presentation-only features, using feedback to identify unclear steps and iterate toward a practical operational tool.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: React, Next.js, HTML, CSS

Backend: Node.js, Fastify, REST APIs, Zod

Data & Cloud: Supabase, PostgreSQL, Drizzle, pgvector, AWS Bedrock, AWS CDK, Docker

Quality & Security: Vitest, ESLint, Prettier, Row Level Security, audit logging, rate limiting

Developer Tools: Cursor, Claude Code, Git, GitHub, AI-assisted development, rapid prototyping, debugging, code review

EDUCATION

B.Tech in Computer Engineering - Ajeenkya DY Patil University, Pune — 2025 - Present

Diploma in Information Technology - Parul University, Vadodara, Gujarat — Completed 2025

Languages: English (fluent), Gujarati (native)
